DNA—DID NOT ATTEND

DNA – a huge waste. You can help us to prevent this. You can also help other patients.

What is a DNA? A DNA is when a patient does not attend for a booked appointment.

Cancelling an appointment is simple.

- Phone us on 0208 651 1222 anytime of the day or night and leave a message
- e-mail us at admin@farleymedical.info
- log on to appointments online where all your upcoming appointments are listed and can be cancelled or rebooked for another date or time.

Please consider registering for our free SMS appointment reminder service which will send you a text reminder a few hours before your appointment. Someone else will be able to use the appointment even if you cancel at short notice. In an average month there are **80 GP and 50 Nurses appointments wasted each month** by patients who have not cancelled their appointments. Someone else will be able to use that appointment even if you cancel at short notice. Please help us to help you or another patient use that appointment. **We will be sending out letters to patients who have not kept their appointments.**

DR GALAIYA AND COILS & IMPLANTS

Dr Galaiya will be returning from maternity leave at the beginning of August and therefore we will be fitting coils and implants once again. Please ring to book an appointment.

CONTACT DETAILS

We sometimes need to contact you urgently regarding appointment cancellations and important test results. Please ensure you have given us your correct home telephone number and if possible a mobile number. It would also be helpful to have your e-mail address. Please ask at reception for a form to update your contact details. This information will not be divulged to any organisation outside the NHS

ELECTRONIC PRESCRIPTIONS

What does this mean for you? If you collect your repeat prescriptions from your GP you will not have to visit your GP practice to pick up your paper prescription. Instead, your GP will send it electronically to the place you choose, saving you time. You will have more choice about where to get your medicines from because they can be collected from a pharmacy near to where you live, work or shop. You may not have to wait as long at the pharmacy as there will be time for your repeat prescriptions to be ready before you arrive. **Is this service right for you?** Yes, if you have a stable condition and you don't want to go to your GP practice every time to collect your repeat prescription, collect your medicines from the same place most of the time or use a prescription collection service now.

TEST RESULTS

Getting test results.

To ensure we are able to maintain our patient confidentiality we would ask that you phone in personally for your test results. When the results of your tests are received back at the surgery they are reviewed and commented on by the doctor and appropriate entries are recorded in the computerised medical records. When this has been completed our admin staff are then able to let you know the result of your tests when you ring up. If a test shows something which needs action or discussion by you and your doctor, we try to contact you by phone, and if there is no answer, we drop you a line in the post asking you to contact the surgery.

Our admin staff are only allowed to pass on information as described in the notes by your doctor and are not permitted or qualified to pass on any opinion of their own.

Unfortunately there is no simple rule as to how long it will take to receive the results of tests back since this varies according to the test. We will normally have the results available for most blood tests within 4 working days, although there are some blood tests which take 6 working days and occasionally special blood tests such as hormone levels can take up to 4 weeks. Swabs, Urine and Stool Tests are usually back within 5 working days after they are taken. X-rays usually take 10 working days and pregnancy tests usually 2 working days. We hope that you will take this information as a guide when phoning up for the results of your tests. We ask for your understanding as there are often delays which are out of our control.

BLOOD TESTS

The ordering of blood tests is now on line through our main provider Croydon University Hospital. The new system will hold information about diagnosis and treatment of any patients using the trusts services and will be used by doctors, nurses and healthcare professionals. This single electronic record will dramatically reduce the use of paper notes, meaning that wherever a patient is and whatever service they are using their clinician will be able to see up to date information. For patients who spend time in hospital and then go on the be cared for by one of our community teams this also means that the whole team will have access to the same information.
